BLACK DIAMOND
PERSONAL JEWELRY STEAM CLEANER

GemOro®
BRILLIANT SPA®
BLACK DIAMOND™

Item # 0362

INSTRUCTIONS FOR USE & SAFETY PRECAUTIONS

FOR INDOOR USE ONLY

ABOUT THIS PRODUCT

Congratulations on your purchase of the GemOro Brilliant Spa Black Diamond! The Brilliant Spa Black Diamond has been factory tested for performance as well as safety and does an incredible job cleaning jewelry just like the professionals comparable steam cleaning equipment. Please be aware that not all jewelry may be steam cleaned. Please check with a qualified jeweler or jewelry expert prior to cleaning your jewelry to confirm if the jewelry in question may be steam cleaned. Always avoid subjecting heavily included stones like emeralds, plus soft or porous stones like turquoise, opals and pearls to heat or steam cleaning.

IMPORTANT: Before using the Brilliant Spa Black Diamond, please be certain to read the following pages including the specified safety precautions. Failure to do so may result in bodily injury or damage to your Brilliant Spa Black Diamond.

SPECIFICATIONS

Power Voltage: 120V AC

Rated Frequency: 60Hz

Rated Power: 1000W

PRECAUTIONS & WARNINGS

1. Be certain that the Brilliant Spa Black Diamond is plugged into a grounded power outlet that has a power rating sufficient to operate the product.
2. The Brilliant Spa Black Diamond is not a toy. Children should never operate it.
3. This product is specifically designed for cleaning jewelry. Although

there are other cleaning applications in which the Brilliant Spa Black Diamond may be used, caution should be used at all times as depending on the item being cleaned it could cause damage to it and potentially you.

4. After being filled with water and plugged in, the Brilliant Spa Black Diamond automatically heats water into steam and quickly builds up pressure. Since the product releases hot steam under pressure, caution should always be used while it is in operation.
5. Always be certain the fill cap with its built-in safety release valve is screwed on “hand tight” prior to use. Do not “torque” the cap as this will damage the sealing gasket. Never operate the Brilliant Spa Black Diamond without the fill cap installed.
6. The Brilliant Spa Black Diamond may only be used with pure, regular tap water. Never add any chemicals or cleaning agents to the water as it will void the warranty and could cause unnecessary damage to the product as well as potentially harm you.
7. The Brilliant Spa Black Diamond is designed to operate with a maximum of 12 oz. of water in its tank. Never overfill the tank or it will not operate as it is designed. An overfilled tank will cause a sputtering of water and wet steam from the nozzle until the water level has been reduced to its optimal level.
8. Never plug in and attempt to operate the Brilliant Spa Black Diamond without water in its tank. If it runs out of water during operation, unplug it and allow sufficient time for cooling of approximately 30 minutes prior to refilling the tank with 12 oz. of water. When removing the fill cap after it has cooled, always unscrew it slowly at arms length while allowing the tank to gradually release its pressure.
9. Never attempt to unscrew the fill cap and refill the Brilliant Spa Black Diamond’s tank while it is still hot and under pressure. You must wait approximately 30 minutes prior to attempting to refill the Brilliant Spa Black Diamond.
10. Keep the power cord away from heat generating appliances and never allow it to become wet.
11. Never direct the steam from its nozzle toward your face, other people or other electrical appliances. Care should always be

given when steam cleaning jewelry so as not to touch the hot steam with your fingers or hands. Always use the supplied stainless steel jewelry holding tweezers or mesh basket when placing items under the hot steam.

12. Never lift the Brilliant Spa Black Diamond by its steam nozzle as it may damage it and burn your fingers. Only lift or move it by its easy-lift handles.
13. Always unplug the Brilliant Spa Black Diamond when not in use.

INCLUDED PARTS

1. Stainless steel removable mesh basket.
2. Water fill funnel.
3. Water fill measuring cup.
4. Stainless steel jewelry holding tweezers (located in rear storage compartment).
5. Steam residue mat.

OPERATING INSTRUCTIONS

1. Place the Brilliant Spa Black Diamond upright on a flat, dry, level surface near the edge of a sink or counter. Alternatively you may place the Brilliant Spa Black Diamond on your counter and then place the included steam residue mat (looks like a mouse pad) under the steam nozzle to catch any residual water from the steam as it cools.
2. Be certain the stainless steel mesh basket is installed into the slot located under the steam nozzle. Insert the basket firmly, while being sure to press hard enough to be certain it is installed securely and completely.
3. With the steamer unplugged and sufficiently cool, carefully unscrew the fill cap slowly until it is removed, If used previously, remove any remaining water in its tank by turning it upside down over a sink. insert the funnel and while using the water fill cup, pour 4 oz. of tap water into the tank empty tank three times, making a total of 12 oz. Never guess at the water level as you might overfill the tank beyond 12 oz. capacity, which will result in a sputtering of water and wet steam until the water level has been

- reduced to its optimal level. Always use the supplied water fill cup or a proper measuring cup.
4. Replace the water fill cap by hand tightening. Do not over-tighten as damage to the silicone gasket can occur which, if damaged, will not allow your unit to seal and build pressure.
 5. Plug in the Brilliant Spa Black Diamond to a grounded electrical outlet that has a power rating sufficient to operate the product. Locate the inline switch on the power cord and turn it on. Within approximately 3 minutes it will automatically heat up the water in its tank creating steam under pressure. The red LED light will indicate that the steamer is warming up and building pressure.
 6. When the green LED light becomes illuminated that indicates that it is ready to begin steaming. Please note that the green LED light will cycle on and off as the steamers thermostat automatically heats up as needed to maintain optimal pressure.
 7. Using the stainless steel jewelry holding tweezers, firmly yet carefully grasp the item being cleaned and hold it approximately one inch beneath the steam nozzle located above the mesh basket or simply place the item being cleaned in the mesh basket. Please note that the mesh basket may be removed when cleaning larger items.
 8. To begin steaming, press down on the black steam release button located behind the water fill cap to release the steam. It is recommended to release it in short, one second bursts while being aware that the longer the item being cleaned is exposed to the steam the more it will naturally heat up and become hot. By allowing a brief delay between bursts the steamer will rebuild pressure. Rotate the item under the nozzle while positioning it in different angles to clean it on all sides. Always allow the jewelry being cleaned sufficient cooling time prior to wearing it.
 9. Inspect the item after cleaning and if it requires additional cleaning repeat these steps noted in #8. For dirtier items, additional steaming time may be required, or presoaking in hot water will help to loosen the dirt or for faster results it is recommended to also first use the GemOro Sparkle Spa Pro personal ultrasonic jewelry cleaner (sold separately) to loosen up the dirt and pre-

clean it prior to steaming.

- When it is necessary to refill the Brilliant Spa Black Diamond, first turn it off and then unplug it from the power outlet. Allow sufficient cooling time of approximately 30 minutes prior to refilling the tank with 12 oz. of water. When removing the fill cap after it has cooled, always unscrew it slowly at arms length while allowing the Brilliant Spa Black Diamond to gradually release any remaining pressure in the tank. Then lift the Brilliant Spa Black Diamond by its easy-lift handles and turn it upside down over a sink to drain any remaining water in its tank. Replace the fill cap.
- When you are finished cleaning your jewelry, unplug the Brilliant Spa Black Diamond from the power outlet by grasping the end of the power cord closest to the outlet.
- Prior to storing the Brilliant Spa Black Diamond after use, always release any remaining pressure in its tank by holding the steam activation button down. After allowing sufficient cooling time, remove the fill cap by unscrewing it slowly while allowing the tank to gradually release its pressure. Then lift the Brilliant Spa Black Diamond by its easy-lift handles and pour out the remaining water.

EASY TO USE QUICK REFERENCE GUIDE

- Remove fill cap, pour in regular tap water and then replace fill cap.
- Power on to quickly build steam.
- When the green LED light illuminates, press steam activation button.

MAINTENANCE

Your Brilliant Spa Black Diamond is designed to be a very low maintenance appliance. With normal usage the tank that is located inside the Brilliant Spa Black Diamond should be cleaned annually to preserve its life. Over time water will leave mineral deposits like calcium residue in the steamers tank, so it is recommended it be flushed out. With the steamer cool and unplugged, pour a small amount of any household cleaner that is specifically designed to remove hard water deposits. Make sure the cleaner is non-caustic and non-flammable as well as non-combustible while being certain that it can be used on stainless steel, like the metal in the tank. Then fill the tank with water, swish around the solution and then allow it time to remain in the tank while following the cleaners instructions. Then pour out the solution in the tank; flush the tank out thoroughly multiple times with regular tap water and resume normal use. The exterior of the Brilliant Spa Black Diamond may be cleaned by hand wiping it with a soft cloth and a mild household cleaner that is designed to be used on plastic, as well as stainless steel. Wipe dry using a soft cloth when finished.

CAUTION

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children do not recognize the dangers that may occur when operating electrical appliances; Therefore keep children away from such appliances.
- This appliance is intended to be used in a jewelry store or household jewelry cleaning application.

WARRANTY

Congratulations on your purchase of the GemOro Brilliant Spa Black Diamond personal steam cleaner for jewelry! Your steamer features a TWO YEAR LIMITED WARRANTY from the date of its purchase assuming the purchaser fills out the WARRANTY REGISTRATION FORM at www.gemoroproducts.com/warrantyregistration. If this criteria is not followed, the Brilliant Spa Black Diamond will automatically be covered by a 90 DAY LIMITED WARRANTY from the date of your steamer purchase, as noted on the bill of sale (if supplied) or through the Brilliant Spa Black Diamond serial number tracking system as interpreted by the factory. In the event the Brilliant Spa Black Diamond is no longer available or has been discontinued and warranty coverage is applicable, at the factory's sole discretion, an equivalent cleaner may be substituted in place of the defective Brilliant Spa Black Diamond. The purchaser shall incur the cost for return postage, insurance and handling for all warranty and non-warranty repairs. Warranty replacements will be shipped FOB Destination to the location of the customer's choosing if located within the Continental United States (U.S.). Should the customer require the replacement unit to be shipped outside the Continental U.S., the customer will be required to pay any related shipping charges and any related taxes/duties for the respective destination country.
