# Motion Sensing Deck Light

## Installation Instructions

Battery Installation

- Remove mounting plate by sliding down and lifting out of keyholes.
- Remove battery cover by pressing up on tab and lifting out
- Insert 3 C alkaline batteries (not included).
- **Note:** Be sure batteries are orientated properly. Markings for +/- are engraved in the battery compartment.

*Estimated battery life of one year running in low light level setting.*

Mounting Motion Deck Light

- Adjust time and light level if desired.
- Install mounting plate in desired location using screws.
- Install front cover by lining up keyholes and sliding unit down.
- Insure top of mounting plate slides into slot at the top of the unit for a secure fit.
- Install locking screw (included) through the bottom of the unit into the mounting surface to prevent removal.
