

**Thank you for purchasing ThawTHAT! Modern**

Please read this guide before using this product. It will help you use, maintain, and prolong the life of your purchase.

**Feature**

- Aluminum tray, working with the thermal liquid sealed inside, provides long-lasting, ultra-fast heat exchange
- Stylish surface design
- Barely perceptible tilt guides melted fluid to the integrated drip tray
- Non-slip silicone feet keep tray above countertop and avoids slipping or scratching
- Just take out and use! No electricity or batteries required

**Certification**

SGS-certified for FDA and LFGB safe contact with food

**Materials**

Anodized aluminum, Stainless steel, Silicone

**Use and Care**

- Clean with fresh water before first use
- Place food onto defrosting tray to begin thawing
- Maximize surface contact between food and tray for faster thaws
- Flip the food to further quicken thaws
- To thaw large quantities of food in succession, rinse defrosting tray with cold water to quickly restore thawing power
- After use, please clean with mild detergent and a soft cloth or scrub, then wipe dry
- Please do not clean with steel brushes or with detergents containing scrubbing agents
- Please do not place the tray in the fridge or near a heat source
- Please do not place in dishwasher
- Please do not cut any items on the defrosting tray
