

CW1500A

# Window Wreath with LED Candle

## INSTRUCTIONS

1. Remove candle flame by turning counter clockwise.
2. Insert 2 "AA" alkaline batteries (-) negative contact first into the candle stick. Be sure that the (+) and (-) terminals on each battery match the (+) and (-) contacts shown in the line drawing. Caution: Do not mix new and old batteries. Do not mix alkaline and standard (carbon-zinc) or rechargeable (nickel cadmium) batteries.
3. Screw the candle flame back onto the candle stick by turning clockwise. Note: Candle will now be on. If left on, candle will turn off automatically after six hours and turn back on again the next day at the same time. The timer cycle may be interrupted when batteries need to be replaced.
4. Candle can be turned off by un-screwing the flame cap several turns.
