

# HOVER HELMETS

Thank you for purchasing a Hover Jersey. Please follow the instructions below to set up your jersey quickly and efficiently.

## PACKAGE CONTENTS

Your Hover Jersey purchase includes each of the following:

Stand With  
Power Switch &  
Digital Clock

Jersey

Spacer Tool  
(found in Styrofoam)

Power Cord

## PLEASE NOTE

Although every piece has been examined and tested for quality compliance by Hover Helmets, please examine all pieces at the time of purchase.

Your Hover Jersey comes with a 90 day limited warranty.

## WARNING!

MAGNETS MAY INTERFERE WITH  
PACEMAKERS. PLEASE CONSULT  
YOUR PHYSICIAN BEFORE USING  
AND OPERATING A HOVER JERSEY.

## CARE AND CAUTIONS

- The Hover Jersey is not a toy. Please keep away from children.
- Keep away from wet areas and surfaces.
- Use only approved power outlets.
- Jersey will "stick" to the top of the stand when unplugged, with sudden loss of power or if it is bumped.
- To clean, use a soft, damp cloth. DO NOT clean jersey or stand with alcohol based cleaners.

## OPERATING INSTRUCTIONS

1. Remove jersey, stand, blue spacer tool and power cord from packaging. Double check each component for damages or missing parts.
2. Place stand on flat level surface for correct positioning and designed performance.
3. Plug in your new Hover Jersey display stand. LED lights will illuminate once proper power is obtained.
4. Place and hold blue spacer tool on top of jersey and position between underside of upper stand and top of jersey (FIG 1).
5. Once your jersey is hovering, slowly remove spacer tool ensuring jersey has remained engaged in correct position (FIG 2).
6. Slightly tap jersey in either direction to initiate perpetual rotation (FIG 3).

## CLOCK OPERATION

1. The clock will be on working status when power is on. The initial time is 12:00.
2. Press the "Set" button for 3 seconds to activate setting format. When the hour number flickers, press "Up" button to set the hour. After hour setting, press "Set" button to confirm and enter the "Minute Setting Mode"
3. Press "Up" button to regulate the minute number, and press "Set" button to confirm.
4. After setting the time above, the clock will confirm all settings automatically if you do not press "set" button to confirm.

Note: When power off, the clock will reset to be 12:00 clock automatically.
