Operation Instructions

HOW TO SET UP THE LUMENOLOGY PORTABLE MOTION LIGHT

- 1a. Rotate the main body downward until the LED Light is facing the Base.
- 1b. Remove the Battery Cover by using your thumb to push inward on the Batter Cover Inset and pull away to remove the Battery Cover.

2. Insert 3x AA Batteries and be sure to align the positive (+) and negative (-) terminals correctly. (Batteries sold separately).

CAUTION: Some equipment using three or more batteries may appear to work properly even if one battery is inserted incorrectly; such usage may lead to battery leakage or rupture that could result in equipment damage.

3. Close the Battery Compartment by aligning the Battery Cover and pushing firmly to re-attach. You will hear a click when successful.

HOW TO USE THE FLEXIBLE TRIPOD

1. Connect the Flexible Tripod by inserting the Threaded Attachment to the Threaded Insert on the Base and rotate clockwise to tighten. Remove by rotating the Flexible Tripod counterclockwise until it's free from the Base.

STANDING

Adjust the Legs of the Flexible Tripod until the Lumenology Portable Motion Light stands to your desired position. Make sure the Tripod is standing on level ground.

HANGING

Gently bend the Legs of the Flexible Tripod to wrap around a pole, fence, etc.

Firmly tighten the Legs to assure a sturdy installation.

NOTE: For best installation, do **NOT** wrap the Legs of the Flexible Tripod in the same direction. Alternate each leg when wrapping them around a bar or fence to insure a safe and successful installation.

HOW TO USE THE METAL PLATE + MAGNET

1. Fasten the Magnetic Plate directly to wood or metal stud for the most secure attachment.

Concrete: Pre-Drill a 1/4" hole and insert the supplied anchor. Place the Magnetic Plate over the Anchor and use the included Screw to secure.

Dry Wall: Pre-Drill a 1/8" hole and insert the supplied Anchor. Place the Magnetic Plate over the Anchor and use the included Screw to secure.

2. Attach the Base of the Lumenology Portable Motion Light to the Magnetic Plate by utilizing the Heavy-Duty Magnets on the bottom of the Base.

3. To detach the Lumenology Portable Motion Light, pull the Light away at a slight angle and it will release from the Magnetic Plate.

NOTE: The Lumenology Portable Motion Light can be magnetically attached to any magnetic surface without installation of the Magnetic Plate.

HOW TO OPERATE

1. Move the Mode-Changing Switch to desired setting (AUTO / OFF / ON) to begin using your Lumenology Portable Motion Light.

AUTO MODE: The unit will be on standby and only illuminate in dark settings when motion is detected within the 13FT detectable range and 100-degree field-of-view. The Light will stay illuminated for 30-seconds unless motion is detected again.

OFF: The Light will not activate.

ON: The Light will remain illuminated until the Mode Changing Switch is moved to the OFF or AUTO position.

NOTE: The Light will not activate in the AUTO user mode if the surroundings are bright. If additional Light is preferred in a bright environment, the Mode Changing Switch should be moved to the ON position.

Certification

IP43 RATING

This device complies with IP43 enclosures. IP43 protects against water spray less than 60 degrees from vertical. IP (or "Ingress Protection") ratings are defined in international standard EN 60529 (British BS EN 60529:1992, European IEC 60509:1989). They are used to define levels of sealing effectiveness of electrical enclosures against intrusion from foreign bodies (tools, dirt etc) and moisture. The numbers that follow IP each have a specific meaning. The first indicates the degree of protection (of people) from moving parts, as well as the protection of enclosed equipment from foreign bodies. The second defines the protection level that the enclosure enjoys from various forms of moisture (drips, sprays, submersion etc).
