BEÜLER®

How To Install

- Put 1pcs 12V 23A battery in the transmitter and mount it on the door with provided double side adhesive tape or screws, make sure the transmitter is not exposed to rain or installed on or near a metal object
- Put 3pcs AA 1.5V battery in the receiver and put it in the house where you want it to be located
- Please change the battery if the unit sound is lower then normal or does not work
- Battery requirement
Transmitter: 12V / 23A alkaline battery
Receiver: 3 X 1.5V AA alkaline battery
- DIY Style, Easy Installation - wiring is not needed. The wireless remote is powered by 1pcs 12v battery, just fix the wireless remote outside with provided double side adhesive tape or screws.
- Recordable Doorbell - just record your message to the receiver, it will play what you say when visitor push the wireless transmitter
- Built-in "DingDong" sound - you can choose the standard "DingDong" sound or switch to your custom recorded sound with the slide switch
- Long Range - Up to 200 foot open space range please note actual range will depend on obstacles between the transmitter and receiver
- Multipurpose Use
It's great for home, office, hotel, reception hall, medical care centers, help button, etc. Alert with a personal message.
