

Hey there, time to relax those eyes from painful light. Look good, feel even better.

Should I wear my Axon eyewear all the time?

This varies by customer. Some customers wear Axon eyewear only while they are in locations which typically aggravate light sensitivity and/or migraine. Others wear them all the time.

How long until they work?

Many customers experience "relaxed" or "rested" eyes immediately. Others don't notice relief until after wearing them for longer period of time and realize their symptoms are less severe.

Can my frames be adjusted to fit better?

If your local optician will not adjust the frames for you, you can adjust the frame yourself using a blow dryer or warm water. Heat the frame arm for about 30 seconds and then gently bend the frame to your desired shape.

What is your return policy?

Non-prescription eyewear can be returned within 60 days after you receive the eyewear for a full refund.

We cannot accept returns on send-in-your-frame orders, prescription glasses, contacts, or product too heavily damaged for resale.

Prescriptions can be remade within 90 days of the original order date for 50% off the original price.
