

Getting Started

aerium

***Attention:**

Our spirulina likes to grow in distilled water. We cannot guarantee growth in tap, well, or non-bottled sources. To prevent damage, ensure that the unit remains plugged in when there is liquid in the vase.

Introducing the aerium®, the world's first natural air purifier that uses spirulina to improve indoor air quality and create oxygen indoors.

The aerium® is designed with elegant simplicity to be low maintenance and easy to use. Before using, please read the full user manual carefully available at algenair.com.

WARNING: The aerium® is an electrical appliance intended for indoor use only. To avoid shock or fire: 1) Unplug when not in use for growing algae. 2) Do not immerse base, cord, or plug in water or other liquid. 3) Inspect cord and plug before use. If cord or plug is damaged, or if appliance malfunctions or has been damaged, do not use. Unplug and contact support@algenair.com for assistance. 4) Plug appliance directly into a properly installed electrical outlet. If you are not sure whether an outlet is properly installed, contact a licensed electrician.

WARNING: Choking hazard. The aerium® contains small parts. Keep away from children and pets, especially when disassembled. WARNING: Glass vase is breakable. Handle with care. The algae solution contains living algae and mineral salts. Do not drink. The mixture is non-toxic but is not intended to be consumed. Keep away from children and pets.
