KH343: Carepeutic Adjustable Non-Dropping Aerobic Hula Exerciser

Refine Your Healthy Living. Stay Confidence with Every Movement!

Take your hula workout to the next level with this cutting-edged innovation of non-dropping aerobic hula exerciser. Its adjustable girth and smart LCD monitor make your exercise more fun, more joyful, and more effective at home or on the go.

This aerobic hula exerciser is made to get you back in shape, make your waist and lower body sturdy, slim and strong. Its hula hoop is built with 16 adjustable, detachable connecting sections that can provide selective girths to let the hoop stay on your waist firmly and let the gravity ball rotate with your body movement. By twisting your waist to rotate the weight-adjustable gravity ball, it helps loosen up lumbar, buttock, thigh, and improve body and muscle to be more elastic and flexible.

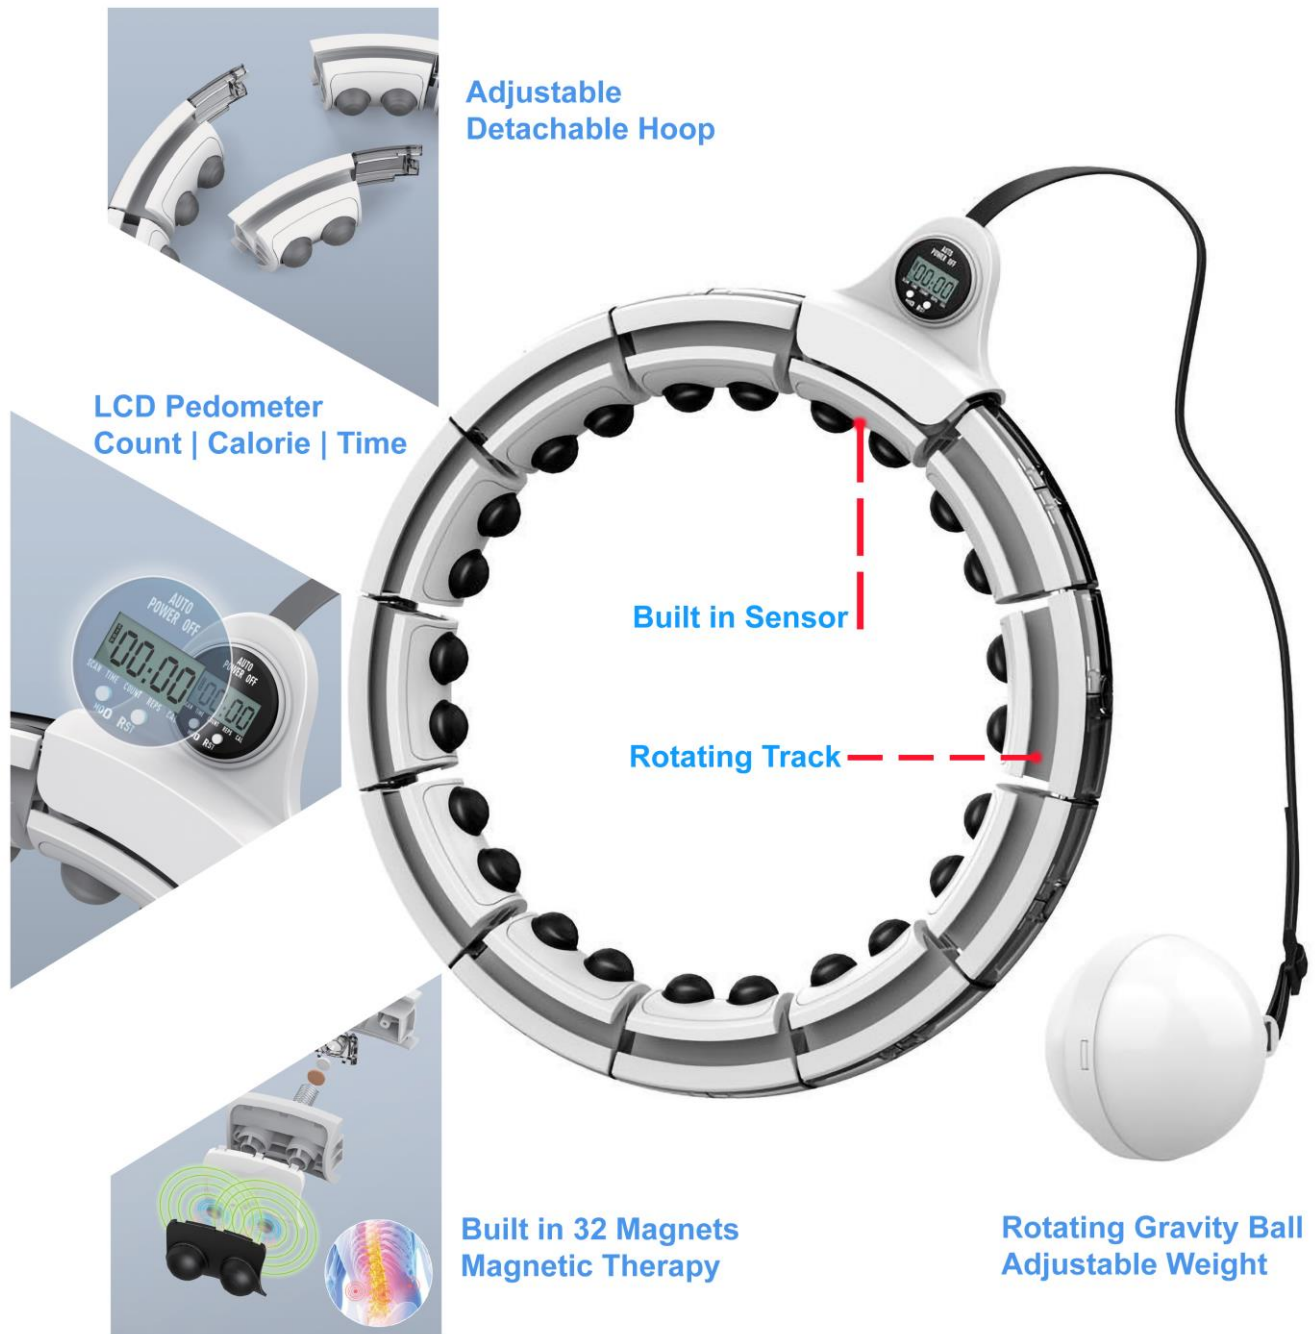

The raised up silicon nodes around the hoop with built in magnets – to create magnetic therapy with body heat

The raised up silicon nodes around the hoop have built in magnets, the movements generate heat and create magnetic therapy. It helps activate the active parts of body, enhance body energy circulation and achieve the effect of slim waist. Its LCD pedometer displays exercise laps, calorie, and time; let you track on your exercise with ease. Its innovative non-dropping design of hula hoop makes it possible for you to walk around while exercising. Put it on and have fun, make you feel empowered and refreshed with just 30 minutes a day!

Cutting-edged innovative non-dropping hula hoop design - built with 16 adjustable, detachable connecting sections that can provide selective girths to let the hoop stay on your waist firmly - twisting your waist to rotate the weight-adjustable gravity ball
