

# **spAIRtray** Model: ST-11000

Thank you for purchasing **spAIRtray**, the world's first window shelf for extra room on *most* commercial aircraft window seats.

## **TO USE:**

Simply unfold the **spAIRtray**

Next, insert one end of the back plate low in the alignment channel for the window's sun visor and slide the other end into the channel on the other side of the window. Adjust the left or right side to level out the tray and... Viola! You now have 1/3 more tray table space to place phones, eyeglasses, e-reading devices, drinks, snacks, or even hang a jacket.

The **spAIRtray** allows you to rummage through your briefcase, or walk about the plane, while your drink stays secure on the **spAIRtray** non-slip pad. For those that feel confined by having the standard tray table in their lap, now you are able to stretch out a little more by putting the tray table up yet still having a place to stow your drinks and travel gadgets.

While **spAIRtray** will not claim to be germ free, at least you know where your **spAIRtray** has been; who knows what the airplane tray tables have seen or the last time they were cleaned.

**Shelf respect:** **spAIRtray** is washable in warm soapy water. Machine washing is not recommended, especially for the non-slip pad.

**Shelf aware:** Please do not use your **spAIRtray** during taxi, take-off, and landing.

**Shelf improvement:** Please let us know what you think, we're always working on ways to make our shelf better.

**Shelfies:** send us a photo of your favorite **spAIRtray** moment. **spAIRtray** fits on most commercial airliners so when you're packing for your next trip, think of your shelf first.
