App Installation

3. WiFi Connection

*QR code will generate randomly

Important Note:

Make sure your Wi-Fi router is using 2.4GHz and not 5GHz. Check your router before using it. Check our Q&A section on the next page if you cannot connect.

4. Loading Kibbles

Note for cleaning:

Remove the Snack Carousel for washing. Do not put it in the dishwasher.

Note: Load only dry kibbles or snack treats, premium freeze-dried raw meat is acceptable.

Using the App

5. App Features

Battery Indicator

Video Record

Photo Taking

2-Ways Microphone

Laser Dot Control

Snacks Release Button

Drive Control Pad

Camera Tilt Up and Down

Q&A

Q: I want to connect Feedbo to another location, how can I do it?

A: For any new connection after the first connection, need to restore Feedbo into the factory setting. Our App has a video to show how to restore it into the factory setting, please check it out.

Q: Feedbo scanned the Wi-Fi connection QR code, it said “Connect”, but it asked me to “Please check your Wi-Fi setting and password”. I rechecked my password and everything is correct, is there any reason for it?

A: Feedbo only supports 2.4GHz router signals. Please make sure you are connected to the 2.4GHz but not 5 GHz. Normally, you can go to the Router Admin page and check the “Router Setting”. All the routers have a different Admin page, the most common is inside the Router App or back of the Router show the IP address for setting. Go to the IP address with the password shown and you should be able to separate the router into different router signals.

If there are any questions, please call your router supporter for technical support or email sales@newkeypet.com.

Q: What is the best way to teach my pet how to play with Feedbo?

A: Introducing your pet to Feedbo, we recommend using the camera only for a few days. We believe this provides your pet comfort and acceptance begins. The Feedbo Pet Robot will become a new companion for your pet bringing you the pet owner comfort when away. Snacks can be used as a reward for your pet when engaged with Feedbo. Play with them showing the treat, toy, and laser dot features to spark their interest.

Q: What should I fill the Snack Carousel with?

A: We recommend filling the Snack Carousel with dry treats only, like freeze-dried treats or kibbles, size under 15mm. Do not use any sticky treats or wet food that can block the outlet.

Q: How long does it take to recharge Feedbo, and how long does a charge last?

A: Feedbo can recharge fully in about 3 hours, and can operate continuously for up to 8 hours.

Tips

1. Do not use while charging.
2. To charge Feedbo, please check the power supply is DC 5V 2A for battery charging.
3. Setup must be on your 2.4GHz network band. The 5GHz network band is not supported. Be sure to select that when connecting Feedbo to your Wi-Fi.
4. Feedbo's 1080p camera automatically adjusts to night vision when light levels are low, and the screen image will change to black and white.
5. When resetting or restoring Feedbo to factory settings the QR code will need to be rescanned to set up again. Please keep the instructions with the QR code image.

FCC warning:

- Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
