Lithium Ion**

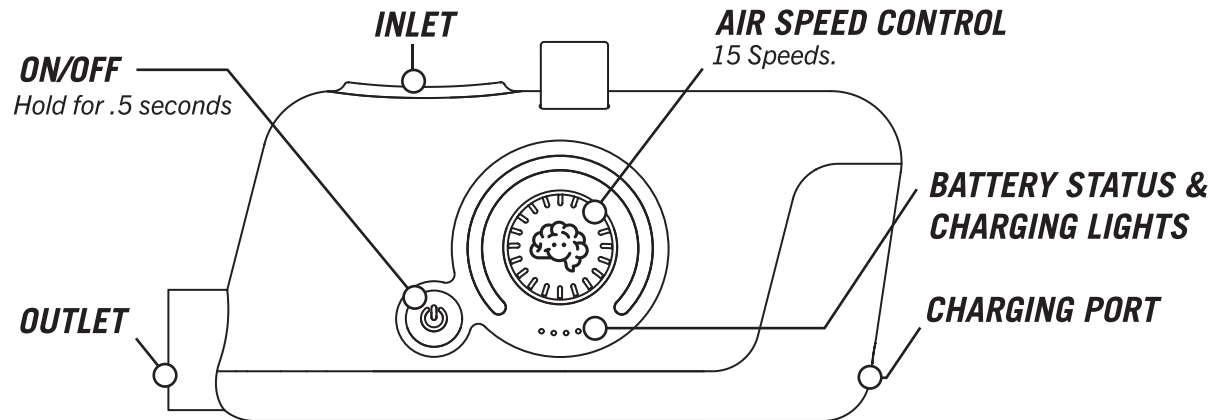

TURNING ON AIR TOOBZ

Save these instructions.

To turn the unit on, press and hold the orange power button for 0.5 seconds. Once on, the 4 blue lights will display the current battery level. The green lights surrounding the speed control dial indicate the current speed setting of the fan. Rotate the dial to adjust the speed of the fan from levels 1 to 15. Press the orange power button again to turn the unit off when you are done playing.

To maximize battery life and prolong playtime, the unit includes an automatic 15-minute shut-off function. To resume play, just press the button to turn it back on.

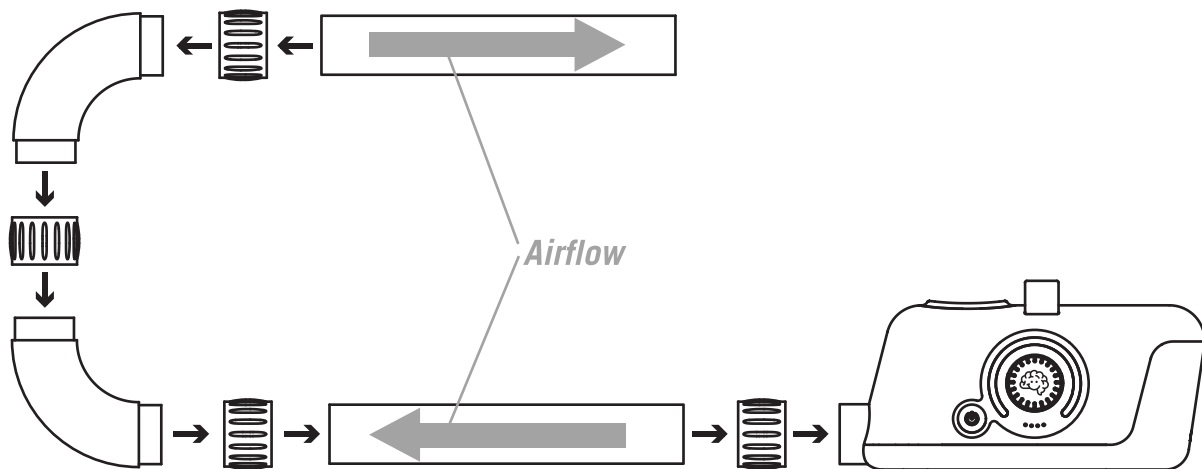

For Retail Store Demo Instructions call 1-800-335-5621

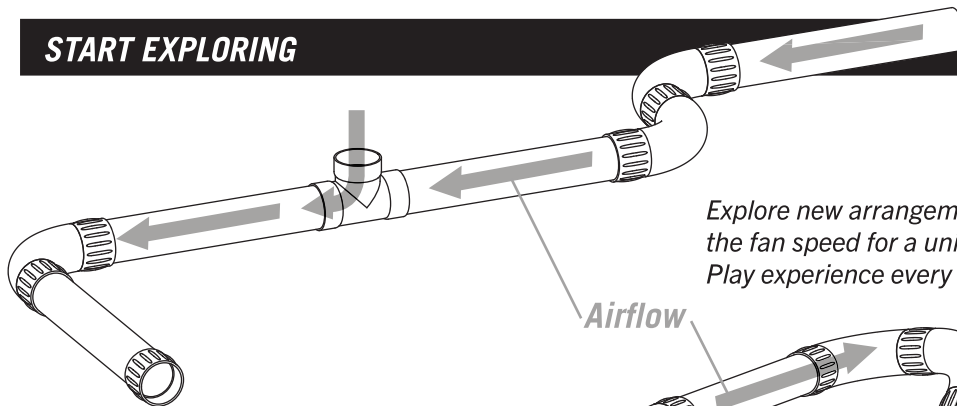

GETTING STARTED

To begin play, connect either a straight tube or corner tube to the fan unit's output using one of the orange connector rings. Continue using the connector rings to connect more tubes to create all kinds of loops, twists, and turns. There's no wrong way to build! Once your tube structure is built, turn on the fan unit, set the fan speed to the desired level, and then feed the balls into the top opening/input of the fan unit, one at a time, to watch them fly through your creation.

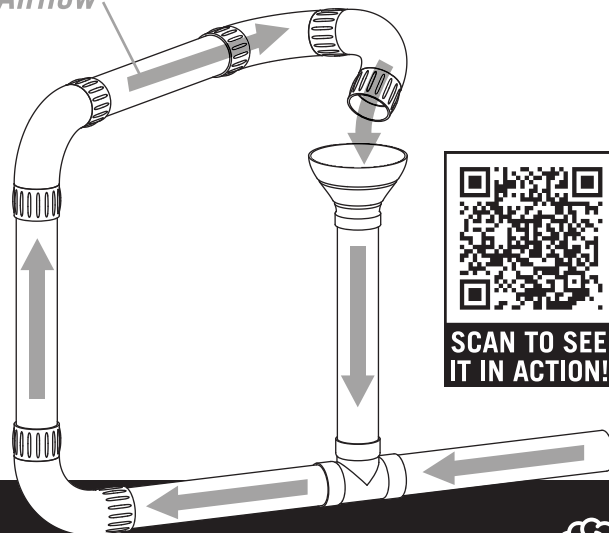

START EXPLORING

Explore new arrangements and adjust the fan speed for a unique Air-Powered Play experience every time.

Airflow

Experiment further by incorporating the Funnel and T Tube into your builds to create another input, a splitter, a continuous loop, and more. The different parts have many different uses and arranging them differently can give you an entirely different result.

SCAN TO SEE
IT IN ACTION!

CLEANING

Do not submerge the main fan unit or accessories in water. Clean external rubber and plastic parts with a damp soft cloth and mild detergent. Wipe dry with a lint-free towel.
