HeatTHAT! GRAVY

Materials

Ceramics, Silicone, PPS

How to Use

1. Heat your gravy separately in a sauce pan.
2. Pour your hot gravy into the HeatTHAT gravy boat.
3. Put the heating plate into the microwave and heat on HIGH for exactly 1 minute. Do NOT overheat!
4. Remove the heating plate and set it on the table.

(continued next page)

5. Set the gravy boat on top of the heating pad.
6. Set the lid on top of the gravy boat.
7. The heating pad may be reheated for 1 minute on HIGH only if the heating pad is lukewarm or cold to the touch.

Precautions

- The heating base can only be heated for one (1) minute on HIGH in the microwave; do NOT heat for more than one (1) minute as the plastic parts can melt.
- Reheat the heating base only when the surface is either cold or lukewarm to the touch.
- Do not touch the heating pad after one (1) minute in the microwave; handle using the outer edges only.
- Do not use this product on cooking range, expose to open flames or submerge in water.

Cleaning and Maintenance

- Prior to first time use, clean using running tap water.
- * The heating base cannot be submerged in water; please wipe clean with a wet towel only. Do not wash in the dishwasher nor under a running faucet.
- The gravy boat ceramics can be washed using a dish washing machine.

Warranty Card

1-year limited warranty provides you with free repair or replacement if manufacturing defects occur within 1 year of your purchase. For product return instructions and shipping address please see: www.thatinventions.com
