

Finding The Edge with Roll Ranger

YES

- Sensor should be placed flat against the roll.
- Hold the sides.
- Rotate the roll.

NO

Incorrect. Sensor will miss edge.

Edge of tape will be in line with the LED light

Sensor will activate only when passing edge in one direction. This tells you which direction to push the scraper. Scrape in direction tool was moving when light activated.

You may hear a 'click' when edge is found.

Tip: Practice on a roll with a known edge location.
