A.Factory experience mode:
Press fingerprint sensor once by any fingerprint, the blue indicator light is on and smart lock is unlocked

B. Register fingerprint:
1. APP connect with smart lock: Please read "E. Connect smart lock" instruction.
2. Enter user management: After waking up the smart lock, click "user management" to enter the fingerprint adding interface.
3. Add fingerprint: Click the "+" icon in the upper right corner of the user management interface (Fig. 15) to enter the add fingerprint interface (Fig. 16-17).
The first 2 fingerprints added for the first time are administrator fingerprints (👤), and the subsequent fingerprints are normal user fingerprint (👤), after successfully added (Fig. 18)
4. Register the fingerprint in the factory mode:
<a> In the factory mode, before App setting, unlock the smart lock firstly. Then press and hold fingerprint sensor by one of your fingers for 8 seconds till the blue light is always on. Then press fingerprint sensor by the same finger 5 times(The green indicator light flashes once each time)and resister the administrator fingerprint successfully. 1-2 fingerprints are administrator.
<b> If register the 3rd and subsequent fingerprints, need the administrator fingerprint to press for 8 seconds till the blue light is always on first, and then press the fingerprint to be registered 5 times. Support up to the 20th fingerprint.

NOTE: Please bind the APP firstly in the factory mode, and then register the administrator fingerprint through the APP. If you firstly register the administrator fingerprint in the factory mode, you will not be able to use the APP/BT function.If you need to restore the APP function, please delete all of the registered fingerprints and restore the factory mode(Please read " J.Resetting: 2" instruction) , and then re-bind the App.
