

ARCWAVE

Pow

Shake it up.

Arcwave Pow is a premium manual stroker with suction control, textured CleanTech Silicone sleeve and dual entry. Pow's intuitive silicone pleasurably tightens during use, while the air pressure release valve creates intense suction for a new and incredible climax.

Arcwave Pow turns pressure to pleasure by harnessing natural air suction with smart design. A manual stroker with a structured Quick Clean Helix silicone inner sleeve and intuitive air pressure release valve, Pow shakes up masturbation for an intense release – and easy clean-up.

Who Is It For

Arcwave Pow is for the confident, mature, toy user who values taking control of their own pleasure, regardless of their sexual orientation or relationship status. They may have tried sex toys before and are looking for something of a higher quality.

Product Key Features & Descriptions

Suction Control

Air pressure release valve tightens the silicone sleeve, creating a controllable, natural suction sensation without batteries. By placing a finger over the air pressure release valve during use, you can control the suction intensity exactly to your liking for a customizable, totally natural feeling.

CleanTech Silicone

Keeping Pow fresh is simple. Arcwave's cutting-edge CleanTech Silicone is ultra-hygienic and durable but is also super smooth on the skin. Precision engineering gives this material a superior finish, as well as making it durable for continued use.

Quick Clean Helix

Smart structure within Pow's inner sleeve optimizes cleaning and drying speed without compromising on those smooth sensations.

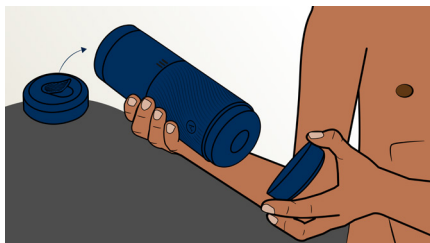

Quick-dry Ventilation Lids

Pow has specially shaped lids designed to protect the toy when not in use as well as enable better ventilation for fast and hygienic drying.

How To Play

1. Remove protective lids

Remove both protective lids from your Pow.

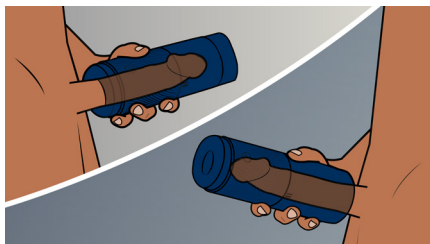

2. Apply water-based lube

Add a little to both your penis and the toy.

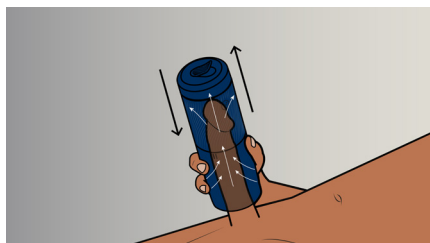

3. Slide your penis inside

Stroke for an enhanced masturbation experience.

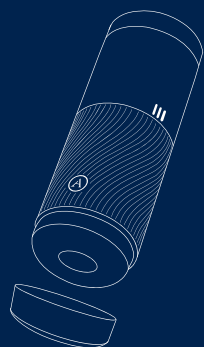

4. Air pressure release valve

Cover and uncover the hole at the end to control suction to your liking.

5. Wash it effortlessly

Just remove the inner sleeve to wash and dry quickly and easily.

Testimonials

"The CleanTech silicone is really smooth and realistic, while the textures increase the sensations—just add a bunch of lube and it gets so slippery slidey – heaven!"

"The design is so smart; it looks like a high-tech speaker or something. I left it out when I had people over and nobody noticed!"

"I like the feeling; the vacuum effect gives an intense orgasm used it several times in a row. I love the shape which lets it dry faster, you can tell this is a quality product."

How To Demo Arcwave Pow

1.

Remove the protective lid and demonstrate that Pow's textured inner sleeve can be removed for easy cleaning – also that it has two differently sized holes at each end to vary sensations.

2.

Note that Pow has no electronic parts so does not require any charging or batteries, which is convenient, eco-friendly and practical for spontaneous use. The toy is also water-resistant. Mention that Pow is available in 3 stylish colors – black, blue and mint.

3.

Next, demonstrate that Pow works best using Arcwave water-based lubrication for a pleasurable slip & slide stroking motion. This water-based lubricant was specifically designed for the premium silicone of all Arcwave products.

4.

Note that Pow is designed to fit 95% of all penis sizes according to the BJU International study that covered over 15K participants. Arcwave's unique CleanTech Silicone makes sure that Pow provides an intense experience.

5.

Explain that, by holding a finger over the air pressure release valve while stroking, the user can control the level of suction created by the toy to their own preference.

6.

Note that Pow has ventilated lids for hygiene and fast drying after it has been cleaned with the Arcwave Toy Cleaner, while also maintaining a stylish look. This alcohol and scent-free solution is specially created for gentle, hygienic cleaning of pleasure products.

7.

Mention that even though the CleanTech Silicone ultra durable, it is not designed to be used with sharp objects and should be handled with care. Be careful with nails and jewelry to last your Pow a long time.
