## SOLAR POWERED GARDEN LIGHTS

**IMPORTANT:** Please read and understand all instructions before installing and using your Solar Powered Garden Lights. Please follow these important steps:

1. Read user manual and Instructions
2. Plan the best location for your Solar Powered Garden Lights
3. Switch to your desired mode (SOLID or BLINKING) and allow to charge for one full day.

**IMPORTANT:** Do NOT setup in a location that is continuously exposed to water. This light is water resistant, but continuous exposure can cause water to seep into device.

Enjoy seeing these garden lights come on automatically at night. The flexible branches allow it to gently wave & sway with the breeze, like fireflies playing in the garden.

### INSTALLATION AND USAGE:

Before installation, please consider below:

#### CHOOSE THE RIGHT LOCATION:

The best location is solar panel facing SOUTH, and should be in direct sunlight early in the morning and remain in sunlight all day. Solar Powered Garden Lights must charge for a minimum of 9 hours to see the full effect of LED lights.

Insert tip of ground stake into the ground until ground stake is standing up straight and securely (Fig 1).

Place Solar Powered Garden Lights stem onto the ground stake. Push down until securely in place (Fig 2).

Choose desired mode using Power / Mode button located on underside of solar panel (Fig 3)

**SOLID** – Lights will remain OFF during the day while charging, and turn on at dusk. All LEDs will remain solid and not blink.

**BLINKING** - Lights will remain OFF during the day while charging, and turn on at dusk. All LEDs will blink continuously.

If you want to turn off your Solar Powered Garden Lights, slide Power / Mode switch on underside of solar panel to OFF position (Fig 4).

#### ADDITIONAL INFORMATION AND WARNINGS:

- If your Solar Powered Garden Lights have not been charged in sunlight for more than 30 days the battery might be drained and it will require full charging.
- If LED lights are appearing dim, it means the power is very low. Charge by sunlight, otherwise device will stop working.
- Depending on your location, it may take longer to charge Solar Powered Garden Lights if the sunlight is not very strong. This is standard for all solar powered devices.
- Keep Solar Powered Garden Lights away from fire and extreme heat.
- Do not drop Solar Powered Garden Lights as it may cause damage to internal battery or electronics.

#### FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
