

# HOVER HELMETS

Thank you for purchasing a Hover Helmet. Please follow the instructions below to set up your helmet quickly and efficiently.

## PACKAGE CONTENTS

Your Hover Helmet purchase includes one each of the following:

Stand

Helmet

Spacer Tool  
(found in Styrofoam)

Power Cord

## PLEASE NOTE

Although every piece has been examined and tested for quality compliance by Hover Helmets, please examine all pieces at the time of purchase.

## WARNING!

MAGNETS MAY INTERFERE WITH  
PACEMAKERS. PLEASE CONSULT  
YOUR PHYSICIAN BEFORE USING  
AND OPERATING A HOVER HELMET.

## OPERATING INSTRUCTIONS

1. Remove helmet, stand, blue spacer tool and power cord from packaging. Double check each component for damages or missing parts.
2. Place stand on flat level surface for correct positioning and designed performance.
3. Plug in your new Hover Helmet display stand. LED lights will illuminate once proper power is obtained.
4. Place and hold blue spacer tool on top of helmet and position between underside of upper stand and top of helmet (FIG 1).
5. Once your helmet is hovering, slowly remove spacer tool ensuring helmet has remained engaged in correct position (FIG 2).
6. Slightly tap helmet mask in either direction to initiate perpetual rotation (FIG 3).

## CARE AND CAUTIONS

- The Hover Helmet is not a toy. Please keep away from children.
- Keep away from damp or wet areas or surfaces.
- Use only approved power outlets.
- Helmet will "stick" to the top of the stand when unplugged, with sudden loss of power or if it is bumped.
- To clean, use a soft, damp cloth. DO NOT clean helmet or stand with alcohol based cleaners.
