Is LaBalance something new?

Angela is so proud of how LaBalance has helped her she introduced the no quibble 90 day money back promise, so women can try the product with confidence.

- LaBalance has been around for over 15 years and we have old and new customers who swear by it.
- **It was invented by Derek Price. In a former life LaBalance was sold under the name LadyCare for menopausal women and MN8 for those experiencing PMS.**
- Angela Day-Moore saw the LadyCare magnet on the shelf whilst attending a meeting with a group of men.
- **Angela was suffering terribly from menopausal symptoms at the time and was invited to try the magnet.**
- She was skeptical about how a little purple magnet could help with her debilitating symptoms, but gave it a go anyway.
- **Within 48 hours she noticed a change and within 3 weeks her symptoms had reduced dramatically. Now all her symptoms have gone.**
- She wanted to champion the products and so created LaBalance. All women deserve to feel 'Sassy' at every stage of their lives.
- **As for her it brought balance and normalcy back to her body and life, so she decided to rebrand it to LaBalance.**

What is LaBalance?

Spread the word as you have
nothing to lose except a 90 day trial

LaBalance is a small powerful directional two-piece magnetic device which discretely and easily attaches to your undies.

It's hormone free and been created with the aim of helping women with PMT, perimenopause or menopause symptoms. It's has a hypoallergenic plastic coating and is so comfortable to wear, you'll forget your are wearing it.

Wear it 24/7 about 4 inches below your belly button - an inch or two either side is fine.

Trials have indicated 7 out of 10 women may experience relief from their symptoms.

Customer testimonies claim it has helped them in as little as 48 hours up to 90 days so give it a fair trial. See a selection of these at <https://www.labalance.life>

We want to help women, so try it and if it doesn't work for you we offer a no quibble 90 day money back guarantee.

How does LaBalance work?

At puberty hormones increase and cause changes a girl's adolescent body and the start of menstruation. Sometimes these changes cause unpleasant symptoms. These may be associated with dysfunction of the Autonomic Nervous System (ANS).

Menopausal symptoms are the result of a natural reduction of hormones, primarily progesterone and oestrogens. These reductions are believed to be the cause an imbalance to the ANS, which is responsible for controlling bodily functions, including stress reactions such as sweating, body temperature, circulation, heart rate, and more.

Magnetic therapies have been used in many cultures throughout the world and the ages.

We do not exactly know how magnetism works but believe magnetism may help to restore balance to the Autonomic Nervous system and so minimise the various unpleasant symptoms.
