**THANK YOU FOR PURCHASING THE MAXSA PARK RIGHT® TIRE STOPPER. JUST PLACE THE TIRE STOPPER ON THE FLOOR WHERE YOU WANT TO STOP, TO PARK PERFECTLY EVERY TIME!**

## Installation:

The Tire Stopper must be installed on a clean, dry floor. If the floor is dirty or greasy, the adhesive will not adhere. Please clean your floor area first.

1. Add the included yellow decals to both ends of the Tire Stopper. The wider end of the decal goes on the end of the Tire Stopper.
2. Identify the location where the Tire Stopper will go by driving the car into the desired parking spot.
3. Use a pencil to draw a line in front of the tire, where the Stopper will go.
4. Drive the car out of the spot so you can easily place the Tire Stopper.
5. Clean the floor where the Park Right® Tire Stopper will be placed.
  - If the floor is greasy, use a cleaner to eliminate grease.
  - Make sure the floor is clean, not greasy, and dry.
6. Pull off the white protector paper to expose the 3M tape and place the Tire Stopper so the edge is on the pencil line.
7. Press and hold the Tire Stopper firmly down for 30 seconds.
8. Test by gently driving until the tire hits the Tire Stopper.

**Warning:** This product can expose you to lead, a chemical which is known to the State of California to cause cancer, birth defects or other reproductive harm. For more information go to: [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov)

**WE HOPE YOU WILL LOVE THIS PRODUCT. MAXSA ALSO CREATES INNOVATIVE AUTOMOTIVE ACCESSORIES TO HELP PARK YOUR VEHICLE, TO NEVER GET STUCK IN SNOW, SAND OR MUD AND WHEN GOING OFF-ROAD AND TO KEEP YOUR CAR NEAT AND ORGANIZED. WE ALSO MAKE SOME GREAT SOLAR AND BATTERY-POWERED OUTDOOR LIGHTS.**
