WALL MOUNTED ARCADE
GAMING PC

Getting Started

- **Power On** the cabinet by lifting the control pad and pressing the power button on the front of the mini PC. The cabinet is surge protected, and can be left on for days or weeks as needed. **Power Off** the cabinet by pressing *Start* and selecting *Quit*, then *Shutdown System*.
- **Turn On Wireless Game Controllers** using the switch at the bottom. Controllers go dormant quickly to save battery. Wake them up by pressing *Start*. A solid red light at the top of the controller means they are awake.
- **Navigate the Interface** by pressing *Up* or *Down* on either the *Arcade Controls* or *Wireless Game Controllers*.
- **Select a System/Game** with *A* or *Select*. Return to the previous screen with *B* or *Back*.
- **In-Game Controls** for classic arcade games (under the MAME heading) use the *Arcade Controls*. All other game systems use the *Wireless Game Controllers*.
- **Exit Game** by pressing *Mode* + *Start* on the *Player 1 Wireless Game Controller*.

Add Favorite: Hold Y

Remove Favorite: Hold Y (on favorite)

Save Game: Mode + X

Load Game: Mode + Y

Troubleshoot

To adjust any of the below settings, you will need to unlock the user interface. Press *Start* on your controller, select *Unlock User Interface Mode*, then press *B,B,B,A,B* on your controller. All settings should now be available.

Game Does Not Launch

On the game wheel, hover over the game, then hold down *A*. Select *Advanced Game Options*, then *Emulator*. Change the emulator from *Auto* to a different emulator, then attempt to run the game again. If it doesn't work, try the next emulator on the list.

Controllers Not Responding / Mapped Incorrectly

The default controller layout for the system requires the use of the Arcade Controls for all games under the MAME system heading. All other systems use the Wireless Game Controllers...

D O N O T U P D A T E S O F T W A R E

...If any of these controllers is not responding, or they are incorrectly mapped, please follow the below steps to correct them:

1 Lift the arcade control pad, then unplug both USBs coming from the arcade controls where they connect to the front of the PC.

2 Restart the system with the arcade controllers still unplugged by pressing the power button on the front of the PC until the yellow light appears, then again so that the blue light appears, and the system powers back on.

3 Once the user interface is loaded, plug the left arcade controller USB plug back into the PC, and confirm that a third controller is showing as an icon on the top left of the screen. Do the same with the second arcade controller, then confirm that a 4th controller icon appears at the top right.

4 If all 4 icons are not showing, repeat the above steps until they all show as icons, then confirm the controls are correct by loading a game.

System Frozen

If *Mode + Start* does not exit a game after 10 to 20 seconds, press the power button on the front of the min PC to turn it off, then again to turn it back on. This will not damage the system.
