

Candy Jewelry

Ingredients:

-  Variety of candies
-  Icing

Supplies:

- Non-edible glue
- Wooden spreader
- Bracelets
- Necklaces
- Keychains
- Rings
- Headband

Candy Jewelry Directions:

1. Choose a necklace, headband, keychain, ring, bracelet or otherwise to decorate.
2. From kit, pick candy toppings and use edible frosting or non-edible glue to attach each piece onto your selected jewelry. Feel free to use your own candies to decorate, too!
3. Firmly press down on each candy to allow frosting or glue to stick as best as it can.
4. Once finished, thoughtfully and carefully place decorated jewelry on a flat surface while frosting or glue dries.

TIP: Candies that fall off may easily be replaced with new candy pieces as needed. Do not eat any candies affixed with glue - eat only candies affixed with frosting
