

产品参数

产品名称	空气消毒机	产品型号	
工作电压	110v-220V 50Hz	活氧产量	150mg/h
功率	5w	负离子	300W
产品尺寸	长165*宽115*厚33(mm)	工作模式	4档可调

产品保修卡

尊敬的用户，本保修卡是您将来申请报销的凭证，请您配合销售商填写并妥善保管备用！

产品名称

保修注意事项

- 1.用户购机时,产品带有一本说明书及合格证，请妥善保管。
- 2.本产品一年质保,自购机之日起,一年内出现非人为质量问题,可联系销售商进行维修
- 3.以下不属于保修范围:
人为原因导致机器损坏，如:私自拆卸，泡水、撞坏。或不可抗因素造成的损坏。

智能空气消毒机

用户使用说明书

使用本产品前详细阅读说明书，感谢您的惠顾及使用

使用前言

使用本产品前，请务必详细阅读说明书，这将有助于您更好的了解产品功能以及简洁的操作方式。现在病毒和空气污染已经严重影响到我们的生活，空气污染以及病毒已经成为影响我们健康的“隐形杀手”，我们希望能通过本产品给大家带来健康的生活已及安全的生活和学习环境。

使用范围

智能空气消毒机适用于厨房、卫生间、客房、酒店、宾馆、车内等各种细菌易滋生场所。

产品功能

杀灭细菌病毒、除甲醛、去异味、净化空气等。

安装方式

- 1、为消毒机寻找最佳安装位置，避免儿童操作。
- 2、请将“消毒机”的安装预留位置用水清洁、擦干、使墙面不留下残留水分及污垢。
- 3、将3M背胶撕开后，贴在墙面所预留位置，按压2-3分钟使其产品牢固贴墙。
- 4、插上电源线“开关键”闪烁。
- 5、触摸“开关键”开机，选择所需要的模式。

工作原理

智能空气净化消毒机采用微电脑控制适量释放臭氧和负离子对空气进行消毒净化，臭氧主动杀菌后，负离子进行净化空气，臭氧具有极强的氧化、催化和杀菌能力，臭氧在常温下短时间内即可自行分解为氧，几乎不留下残留物，是国际公认的无污染、无死角最清洁的消毒方式。臭氧对甲醛、苯、甲烷、氨气等有害气体进行快速分解。

负离子是空气成分中一种微型的元素，它本身带有负电荷。因为空气中大部分的有害物质都带有正电荷，对人体健康不利，这就注定了负离子会成为人们健康生活中的益友。负离子在空气中的含量是决定空气质量好坏的一个重要因素，空气中含有适量的负离子不仅能高效的除尘、除PM2.5颗粒物、除臭、消除疲劳等功效。同时还能够激活空气中的氧分子，让我们享受携带来的清新空气中的氧分子。

以下是臭氧科学分解原理公式

甲醛去除原理：

甲醛+臭氧=二氧化碳+水+氧气

苯去除原理：

苯+臭氧=二氧化碳+水

一氧化碳去除原理：

一氧化碳+臭氧=二氧化碳+氧气

氨去除原理：

氨+臭氧=氮气+氧气+水

Product warranty card

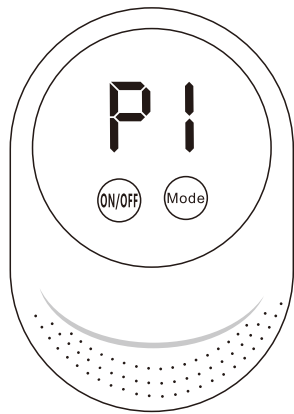

Dear user, this warranty card is the certificate for you to apply for after-sales service in the future. Please cooperate with the seller to fill it out and keep it properly.

Product name			
Product model		Warranty period:	MM DD YY
Vendor name			
Vendor address			
Customer name		Purchase date:	MM DD YY
Customer address			
Contact number			

Warranty precautions

1. When the user purchases the machine, the product comes with an instruction manual and a certificate of conformity. Please keep it properly.
2. This product is guaranteed for one year. If there are any non-human quality issues with in one year from the date of purchase, you can contact the seller for maintenance.
3. The following are not covered by the warranty:
(1). Machine damage caused by human factors, such as unauthorized disassembly, soaking in water, collision damage, etc.
(2). Damage caused by uncontrollable factors.

Air Purifier

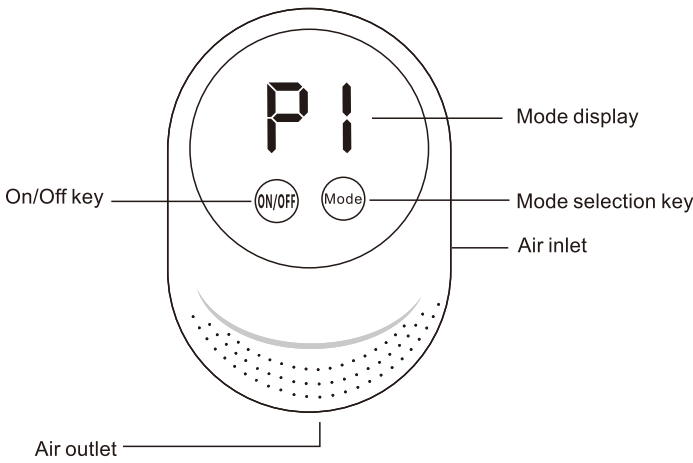

User manual

Please read the instructions carefully before using this product. Thank you for your purchase.

Product Parameters

Product name	Air cleaner	Product model	
Working voltage	110V-220V 50Hz	Active oxygen production	150mg/h
Power	5W	Anion	300W
Product size	L165*W115*H33(mm)	Working mode	Four settings

Using Preface

Please read the instructions carefully before using this product, which will help you better understand the product functions and simple operation methods.

Now viruses and air pollution have seriously affected our lives. Air pollution and viruses have become "invisible killers" of our health. We hope to bring you a healthy and safe living environment through this product.

Scope of Use

Intelligent air eliminator is suitable for rooms, toilets, guest rooms, stores, hotels, cars and other places where bacteria are easy to breed.

Product Function

Kill bacteria and viruses, remove formaldehyde, eliminate odors, purify air, etc.

Installation Mode

1. Find the best installation location for the purifier.
2. Clean the reserved installation location thoroughly.
3. Use 3M adhesive to stick the purifier to the reserved position, press for 2-3 minutes to make the product stick more firmly.
4. Connect the power and select the appropriate mode to start working.

Working Principle

The intelligent air purification and disinfection machine is controlled by a microcomputer, which releases an appropriate amount of ozone and negative ions to disinfect and purify the air. Ozone has strong oxidation, catalytic, and bactericidal abilities. After ozone disinfection and sterilization, negative ions purify the air.

At the same time, ozone can quickly decompose harmful gases such as formaldehyde, benzene, methane, ammonia, etc. Ozone can decompose into oxygen in a short period of time at room temperature, leaving almost no residue. This is internationally recognized as the cleanest way to eliminate pollution and dead corners.

Negative ions are small elements in the composition of air that have a negative charge. Due to the fact that most harmful substances in the air carry a positive charge and are harmful to human health, negative ions are destined to become beneficial friends in people's healthy lives. The content of negative ions in the air is an important factor determining air quality. Negative ions in the air not only effectively remove dust and PM2.5 particles, deodorize, and eliminate fatigue, but also activate oxygen molecules in the air, allowing us to enjoy fresh air.

Working Mode

1. Plug in the power cord and the "on/off key" will flash.
2. Touch the "on/off key" to turn on the device and select the desired mode.
P1: After working with ozone and anions for 3 minutes, stop for 1 hour and start the cycle. It is applicable to pet room and household toilet, with an area of less than 5 square meters.
P2: After working with ozone and anions for 5 minutes, stop for 2 hours and start the cycle. It is applicable to bedroom, kitchen and household toilet, with an area of less than 10 square meters.
P3: After working with ozone and anions for 30 minutes, stop for 4 hours and start the cycle. It is suitable for high-speed purification in large space, with an area of more than 30 square meters.
P4: After working with ozone and anions for 25 minutes, stop for 12 hours and start the cycle. It is suitable for living room, bedroom and household toilet, with an area of less than 20 square meters.

Purchase Notice

- 1.This product is sterilized, disinfected and purified by ozone and negative ions.
- 2.The maximum ozone release of this air purifier is 150mg/h, and the maximum anion release is 3 million per second, both within the range of safety for humans and animals.
- 3.When the machine is in use, the mode needs to be selected. After the ozone mode is completed, the ozone needs sufficient time (about 20-30 minutes) to be converted into oxygen.
- 4.Recommended use times: once a day in the toilet.
- 5.Before using this product, please understand the operation principle and correct use method of the machine in detail.
