## USB RECHARGEABLE CORDLESS Curling IRON

INSTRUCTION MANUAL

RHC2

### Important Safety Instructions

When using electrical appliances, especially in the presence of children, the following safety instructions should be observed.

**Please read the instructions carefully before use.  
Please keep the appliance away from water.**

### Safety Precautions

Warning: Please be careful with the packaging or plastic bags used on the product; keep them away from children.

Do not use in cribs, beds, carriages, or playpens as the thin film of the plastic bag may cover the nose and mouth, obstructing breathing. This plastic bag is not a toy, please be cautious.

**Warning:** Do not use this appliance near filled bathtubs, showers, sinks, or other water containers.

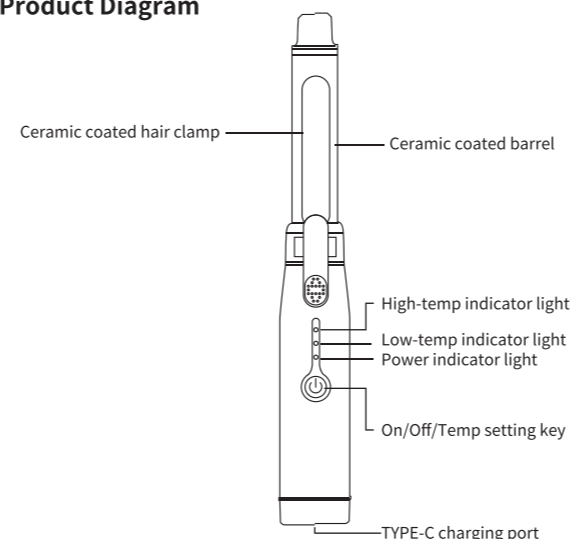

The above symbol indicates "Do not use while bathing or showering."

- 1.This product has an electric heating function and is not suitable for use by individuals with mental disabilities, lack of safety awareness (including children), or physical and sensory impairments, unless supervised and guided by a guardian.
- 2.This product has an electric heating function and should be placed out of reach of children when not in use, and children should be prevented from touching or playing with it during use and cooling.
- 3.The plastic bag of the product should be placed out of reach of infants and young children.
- 4.This product is not waterproof and should not be used in damp or water-prone environments such as bathrooms.
- 5.Please use this product for its intended purpose.
- 6.Please use a charger provided by the legitimate manufacturer that can provide the rated charging voltage and current for charging.
- 7.Please use a charging cable produced by a legitimate manufacturer that can provide a charging current of 1A or higher.
- 8.Do not use this product near flammable or explosive materials, as this may cause fire or explosion accidents.
- 9.Do not leave the product unattended while charging, and be sure to remove the charger after it is fully charged.
- 10.Do not pull the charging cable directly.
- 11.Do not use accessories or parts produced by other manufacturers that are not recommended by the manufacturer of this product. If such accessories or parts cause damage to the product, the company will not provide warranty.
- 12.Do not place the product on a heat-sensitive surface during use or cooling.
- 13.Be careful to avoid direct contact between the hot surface of the product and the skin, especially the eyes, ears, face, and neck.
- 14.Do not insert metal objects into the product to avoid short circuits and product damage.
- 15.After use, do not wrap the charging cable around the product, as this may damage the cable.
- 16.Ensure that the product has cooled sufficiently before storage.
- 17.When using the product, choose the appropriate temperature and time for your hair, too high a temperature and too long a time may lead to hair damage.
- 18.when using this product for the first time, the oil in the appliance may produce a slight burning smell or a little smoke when encountering high temperatures, which is a normal phenomenon and will disappear after a period of time, please feel assured to use it.

- 19.The heating speed of the product will vary depending on the power left.
- 20.When the the working indicator light and the power indicator light alternately flash red during use, it indicates that the temperature sensor is faulty and should be sent to the manufacturer's maintenance department for repairs in time.

### Product Diagram

### Features

- Built-in large capacity 3000mAh lithium-ion battery
- New metal alloy heating film with fast heating speed
- Heating status and working indicator
- Battery status and power indicator
- Charging time is  $\geq 3$  hours, and once fully charged, it can be used for approximately 30 minutes. Universal TYPE-C charging port, apply to most of the phone chargers
- One touch to turn on/off and adjust the temperature settings. Two temperature settings: the low is about 320°F, and the high is about 356°F.
- Automatic off 15 minutes after no operation.

### Instructions for Use

For the best user experience, please ensure that the product is fully charged and make sure you have fully understood all the precautions for using this product before use.

- **Power on:** Press and hold the "On/Off/Temp setting key" in the off state for about 2 seconds, the working indicator light flashes green and the product starts to heat up (the power indicator light is on at the same time, the color of the power indicator light: green light indicates full power and red light indicates low power).
- **Power off:** Press and hold the "On/Off/Temp setting key" in the on state for about 2 seconds, the indicator will be off and the device will stop working.
- **Setting mode:** Short press the "On/Off/Temp setting key" in the on state to switch between the low temperature setting of about 160°C (green indicator light) and the high temperature setting of about 180°C (red indicator light).
- **Preheating:** When the working indicator light changes from flashing to constantly on, it indicates that the product has reached the preset temperature and can be used.

Attention: After using the product, please make sure that it has been turned off and completely cooled before storing it, otherwise it may cause burns or other hazards. Attention: As this product is a rechargeable wireless device, putting it in a bag or suitcase for carrying or storage may cause the power to be accidentally activated, leading to the product heating up, which could result in burns or fire hazards. Therefore, please handle, store, and carry the product with care to avoid accidental activation of the power source.

Attention: The rated standby time for this product is 30 minutes, but actual wireless usage time may vary depending on different hair types and usage environments.

### Start Styling

#### How to Curl

**To ensure the desired styling effect, divide the hair into multiple strands based on the hair volume and desired style, and keep the non-styled hair sections fixed.**

- Start by curling a strand of hair about 1/2 inch wide.
- Open the hair clamp, place the hair close to the scalp on the curling barrel, and curl the hair.
- Release the handle after reaching the ends of the hair and let the hair slide out.
- Repeat this step on other sections of hair until you achieve the desired hairstyle. Some sections of hair may require repetition, depending on hair type.
- You can repeat multiple times until achieving the desired effect. After styling, allow the hair to cool and then comb it through.

**Note:** Be sure to use after smoothing your hair. If used in situations where the hair is knotted or bonded, it will affect the experience during use.

▲ The product will be automatic off for safety reasons 15 minutes after no operation. For further use, turn on and operate again.

### Instructions for Charging

- 1.Please fully charge the product before use to get the best using experience, and please ensure that each charging time is not less than 3 hours.
- 2.Please fully charge the product before long-term store, and ensure that it is charged every three months to keep it in optimal condition.
- 3.Due to the inherent characteristics of lithium batteries, there may be a decrease in capacity after multiple uses, which is a normal phenomenon.
- 4.in order to maximize the efficiency of lithium batteries, the recommended ambient temperature for charging is 5°C-40°C. When the ambient temperature exceeds the above temperature range, the charging function of the product may be disabled. When charging is abnormal, please confirm whether the ambient temperature is within the recommended range.

- When in charging, the power indicator light flashes to show the current power (green light indicates full power and red light indicates low power).
- When fully charged and the charger is still connected, the green power indicator light will be constant on.
- Unplug the charging cable, the indicator light will be off.
- When connected to the charger, the functions of the product will be locked and cannot be operated.

**Note:** This product has built-in lithium batteries, if you need to carry this product on the plane, please consult the relevant airline regulations on lithium battery before travel, so as not to cause trouble for your traveling.

### Protection and Error Tips

**Low Battery Protection:** During use, when the battery level falls below a certain value, the power indicator light will flash five times and then turn off to protect against over-discharge, and the product will automatically shut down.

**Auto Shutdown:** For safety reasons, the product will automatically shut down if there is no operation detected for 15 minutes after being turned on. To continue using, it needs to be turned on again.

**Sensor Malfunction:** When the working indicator and power indicator lights alternately flash red during operation, it indicates a temperature sensor malfunction. In this case, the product should be sent for repair in time.

**Charging Protection:** To ensure the optimal performance of the lithium battery, it is recommended to charge the product in an environment with a temperature range of 5°C to 40°C. If the ambient temperature exceeds this range, the charging function may be disabled. If charging issues occur, please first confirm if the ambient temperature is within the recommended range.

### Cleaning and Maintenance

- This product is not waterproof, when cleaning, it is important to avoid water or other liquids entering the interior of the product through gaps or surface, as this may short-circuit the product.
- After each use, please clean up the hair, dander and other foreign objects left on the comb teeth in time.
- Please make sure that the product has been cooled down before cleaning and maintaining the product.
- Do not use sharp or corrosive, volatile, diluting detergents.
- Clean and wipe the product with a soft, damp cloth (with a small amount of detergent), and dry it with a soft, dry cloth.

### Product Specifications

Product Name: Portable Curling Iron  
Product Model: PCS-03  
Operating Voltage: 3.7V  
Rated Input: 5V = 1A  
Heating Power: 30W  
Operating Temperature: About 320°F, 356°F  
Preheating Time: 90s  
Charging Time: about 3h  
Battery Capacity: 3000mAh

### Environmental Protection

This product contains a built-in rechargeable battery. When disposing of this product, please do not discard it with general household waste. Please ensure that this product is disposed of at a government electronic product recycling center or collection point.
